DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States
- 2. Claims 1-7,9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Livingston.

Livingston shows the claimed invention, including an outer hull, box-like stringer member, and an inner hull. Hollows are provided at **25**, **30** and **31**.

Re "formed by..." in claim 1, such is method of making, carrying no weight in these apparatus claims.

Re claim 4, "by gages..." is considered to be directed to method of making, and is accorded no weight.

Re claim 5, Livingston states additional floatation may be added to the void spaces.

Re claims 6 and 7, such are considered method of making.

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 11 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Livingston in view of Fulks.

Art Unit: 3617

Livingston fails to disclose the spraying of the resin and glass, as is considered to have been old and well known in the art at the time of the invention, as evidenced by Fulks, who teaches application of chopped glass and resin by spraying same.

It would have been obvious to one of ordinary skill in the art at the time of the invention to apply the resin and glass for securement of the box stringer of Livingston as by spraying, as taught by Fulks.

Such a combination would have been desirable at the time the invention was made so as to provide even application of product is a short amount of time.

The amount

5. Claims 12,13,18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Livingston as applied to claim 11 above, and further in view of Glass et al.

Livingston fails to disclose the pressing of the layers with a roller.

Glass et al. Teaches the pressing of glass/resin layers with a roller to cause trapped air to escape.

It would have been obvious to one of ordinary skill in the art at the time of the invention to press the layers of Livingston with a roller to remove trapped air as taught by Glass et al.

Such a combination would have been desirable at the time the invention was made so as to provide improved adhesion of layers.

The amount of exterior sprayed is considered a design choice.

Art Unit: 3617

6. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Livingston.

Provision of a seat within the hull of Livingston is considered to have been an obvious choice of design.

Re "by gages..." is method of making as such is directed to the mold.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Wagner discloses a box-like member, as well as rollers.

- 8. Claims 14-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ed Swinehart whose telephone number is 703-308-2566. The examiner can normally be reached on Monday through Thursday 6:30 am to 2:00 pm..
- 10. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Samuel Morano can be reached on 703-308-0230. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
